Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-13 and 16-37 are rejected under 35 U.S.C. 102(e) as being anticipated by McNaughton (2006/0073216).

McNaughton teaches a composition which comprises the same sulfamate stabilized, bromine based derivative as in the current invention (see 0023, 0031 and 0032). Such may be used in a composition which comprises xanthan or guar at levels which would be inclusive of those of a fracturing fluid (see 0052 – 0054). Such would inherently act to reduce viscosity over time. Applicants intended use of the composition as a fracturing fluid is not distinguishing (In re Pearson 181 USPQ 641).

3. Claims 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: Claims 14 and 15 include a step of adding the breaker to a well, which is not taught by McNaughton..

5. Applicant,s amendment has distinguished over Moore, Yang, McKinnie and Nalepa which fail to teach the polysaccharide of the currently amended claim 24. Applicants Terminal Disclaimer has overcome the obviousness double patenting rejection. With respect to the rejection under 35 USC 103(a), it is agreed that oil field waters would not be inclusive of fracturing fluids, and thus the present invention would not be rendered obvious in view of such term. A new rejection is presented herein.
